

M MODULAR BRIDGES

SERIES

MORE FLEXIBILITY... Hydro Mobile's new modular bridges line up offers more configurations using less components. They can now reach up to 64' with a single unit and up to 148' in a twin unit setup.

MORE SIMPLICITY... The modular design of the new M-Series bridges makes it easier to configure setup and calculate bridges length. They have also been designed with a dedicated wall side so they can be used on both the left and right side of the power unit.

MORE CAPACITY... Lighter bridges create less dead weight and results in more capacity. Up to 35% more on certain cantilever bridges.
