*Over 100 years of
reaching new heights*

November 2, 2009

To whom it may concern:

As one of New England's oldest and most established construction equipment supply houses, we decided to enter into the Mast Climbing field to complement our extensive lines of scaffolding and aerial platforms.

After much analysis and research of the manufacturers, their various types of equipment and infrastructures, we cast our lot with Hydro Mobile platforms. We became convinced that Hydro offered the most versatile and best made mast climbing platforms in the market place.

Now five years later, we know we made the right call. A very well made product, great product support and an organizational belief in the necessity of strong education, training and safety programs. During our evaluation period, prior to our alignment with Hydro Mobile, we were quite fortunate to have had the cooperation, advice and counsel of the established dealer network which we found most helpful. Now we find ourselves in a position to return the favor and would welcome all questions as others conduct their own form of analyzing this rapidly growing field.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel F. Marr", is written over a printed name and title.

Daniel F. Marr
President & C.O.O.
