RE: IS 404

Dear Howard,

I would like to express how pleased we are with the Hydro Mobile mast climbing work platforms. Since March the work platforms have been an invaluable addition to our IS 404 job site in Long Island City, New York. As a general contractor we are constantly looking for ways to increase productivity without jeopardizing safety, and this machine was able to accomplish this for us.

Our masons could continue their work without having to stop and move to allow the laborer to jump up to the foot plank, they no longer had to reach or bend over, the mast climber eliminated the danger of overhead loading and most importantly we were able to keep our job up to par without the fear of missing toe boards, hand rails, overloaded feeder areas or illegal ladder access. When used correctly the machine is a general contractor and safety managers dream.

Additionally, the erector and dismantler training session was extremely beneficial to the laborers who were able to set up and take down the machines under your trainer's supervision.

We are excited to continue our relationship with your company on future endeavors.

Sincerely,

A handwritten signature in black ink, appearing to read 'Thomas Mullahy', written over a horizontal line.
